

South Holland IDB Audit Commission National Fraud Initiative

The Board is now required by the Audit Commission to share information with other bodies responsible for auditing or administering public funds, in order to help prevent and detect fraud.

The Audit Commission appoints the external auditor to audit the accounts of this Board. It is also responsible for carrying out data matching exercises.

Data matching involves comparing computer records held by one body against other computer records held by the same or another body to see how far they match. This is usually personal information. Computerised data matching allows potentially fraudulent claims and payments to be identified. Where a match is found it indicates that there is an inconsistency which requires further investigation. No assumption can be made as to whether there is fraud, error or other explanation until an investigation is carried out.

The Audit Commission currently requires us to participate in a data matching exercise to assist in the prevention and detection of fraud nationally. We are required to provide particular sets of data to the Audit Commission for matching, the details of which are set out in the Audit Commission's guidance, which can be found at www.audit-commission.gov.uk/nfi.

The use of data by the Audit Commission in a data matching exercise is carried out with statutory authority under its powers in Part 2A of the Audit Commission Act 1998. It does not require the consent of the individuals concerned under the Data Protection Act 1998.

For further information on data matching please contact the Board's [Finance Officer](#). Full contact details are shown on the WMAs [Organisation](#) webpage.
