BROADS (2006) IDB RATE ESTIMATES FOR 2023-24

EXECUTIVE SUMMARY

- 1. Members are asked to approve an increase of 10% in drainage rates and 10.01% in special levies for 2023-24, as shown in Option 3 below, which will minimise flood risk and deliver a balanced budget within the next 4 years, as requested by the Board last year.
- 2. The increase for special levies is slightly higher this year than it is for drainage rates because of the increase in the proportion of aggregate annual value that has occurred as a result of development in the area. As land is developed and no longer farmed, the proportion of the Board's net expenditure that is financed from drainage rates reduces, and the proportion of the Board's net expenditure that is financed from special levies increases. The councils will now be collecting Council Tax and/or Business Rates on this land, which should help them to fund this increase in their proportion of our net expenditure.
- 3. Over the last 15 years, the Board has been financing a significant and increasing proportion of its day-to-day operating expenditure from reserves, which is not sustainable. If we continue to do this at the same rate, we will run out of money within 3 years.
- 4. Therefore, in order to place the Board's finances on a more sustainable footing, we need to increase drainage rates and special levies so that we can deliver a balanced budget within the next 4 years. This view has been echoed by the Board's Internal Auditor.
- 5. In addition to proposing a more realistic increase in drainage rates and special levies, we plan to reduce our technical support costs by 11%, but still carryout the full maintenance programme on the high, medium and lower priority channels to minimise flood risk in the area, as shown in the preceding Works Programme. Consequently, a reducing part of the Board's day-to-day operating expenditure will continue to be financed from reserves, but only for the next 4 years. This is reflected in Option 3 below.
- 6. We also plan to continue to invest and deliver an ambitious Capital Programme, which is 100% financed by grant-in-aid and should reduce maintenance costs in the future.
- 7. If we were to finance all our day-to-day operating expenditure from drainage rates and special levies this year, we would need an increase of 23.02% in drainage rates and 23.03% in special levies (Option 1 below), which is likely to be unaffordable and why we are proposing to phase-in increases in drainage rates and special levies/reductions in net expenditure over the next 4 years.
- 8. If we were to make cuts in the programme and only carryout maintenance work on the high and medium priority channels shown in the Works Programme, we would require an increase of 4.21% in drainage rates and 4.22% in special levies, as is reflected in Option 2 below. However, flood risk would increase in the area because there would be parts of the district that we could no longer protect (the areas served by the lower priority watercourses, as shown in the preceding Works Programme).
- 9. This year we are proposing to increase drainage rates and special levies more significantly than in recent years, at the same time as reducing expenditure and using reserves to finance our day-to-day operating expenditure for the next 4 years, so we are cutting our cloth and not just expecting drainage ratepayers and councils to pick up the shortfall when the reserves disappear.
