(\*) Notes:

1) SCH27 River Wensum Culvert Inspections is assessing the need for repair / replacement of culverts under the River Wensum. The asset inspections started in Summer 2022 but will continue into Spring 2023. Following the results we may need to develop a Capital FCERM project. With a current cost estimate at £2.15m we would only progress the project when a full funding package is in place. We will know more about the work required and the associated costs once the inspections are complete.
