

## Job Description

<b>Job title:</b>	Assistant Project Manager / Project Manager
<b>Team/Section:</b>	WMA
<b>Department:</b>	Project Delivery Team
<b>Location:</b>	Head Office in King's Lynn, Satellite Office in Norwich with frequent travel required to sites
<b>Responsible to:</b>	Project Delivery Manager
<b>Hours:</b>	Full-Time: 37 hours per week
<b>Grade/Salary:</b>	£30,000 to £55,000 (dependent upon qualifications and experience)
<b>Employer:</b>	King's Lynn IDB trading as the Water Management Alliance

## Context

The **Water Management Alliance (WMA)** is a group of like-minded Internal Drainage Boards (IDBs) who share vision, values and standards and have chosen to jointly administer their affairs in order to reduce costs, strengthen their own organisations and increase influence at both regional and national level.

**Internal Drainage Boards ("IDBs")** are local public authorities that manage flood risk and land drainage within areas of special drainage need in England. IDBs undertake a vast range of vital work to reduce flood risk and manage water in a way that meets the local needs of residents, businesses and agriculture in accordance with their environmental duties whilst enhancing the ecological wellbeing of their districts.

Working in the East of England, this is a fantastic opportunity for a career in water engineering management. We are looking for an enthusiastic individual who is willing to learn and be a part of a hard-working team.

The **Assistant Project Manager / Project Manager** is responsible for:

Helping to develop and deliver the Boards' capital and recharge work programmes through;

- Support to existing Project Delivery Engineers, Project Managers and Project Delivery Team
- Delivering standalone recharge schemes for the relevant Board
- Delivering existing contracts in our works programme
- Producing Health, Safety and Environment paperwork for scheme delivery
- Site management during construction delivery phase
- Procuring and managing sub-contractors aiding scheme delivery
- Assisting with the financial management of existing and future delivery projects
- Support to Capital delivery projects
- Providing support on all engineering and operations delivery matters
- Contract management of capital works

Being involved in the delivery of Capital improvement projects involving culvert

replacements, pumping station replacements, estuary flood defence improvements, environmental engineering projects, small 3<sup>rd</sup> party recharge projects, as well as other civil engineering work.

### Main Duties/Responsibilities

- Delivery of existing and upcoming capital projects within the WMA. This will include involvement with the maintenance, repair and replacement of the Boards assets.
- Involvement with the preparation and promoting of grant applications/work programmes for submission to DEFRA/Environment Agency and other bodies.
- Working with partners, community groups and stakeholders to design and deliver successful projects and work programmes.
- Preparing work in line with work programmes and liaising with the Project Delivery Manager and Project Delivery Engineers, Operations Managers and Technical Support team accordingly.
- Coordinating and liaising with our supply chain - contractors and consultants to aid efficient and timely delivery of projects.
- Being aware of the required 3rd party consents and constraints upon our project delivery and support obtaining these permissions in a timely manner in accordance with the delivery programme. Ensure that work is only undertaken with the necessary assent and or permissions from Natural England and others as relevant for the work in hand.
- Be the delivery manager / lead for specific standalone projects and or support the existing Project Delivery Engineers to do the same.
- Conducting any procurement as a project need dictates all in accordance with the Financial Regulations and Procurement Procedures.
- Delivery of work on site, in a safe, lawful and competent manner in accordance with the Board's procedures, policies and standards. Lead by example and be involved in the continuous improvement of the standards we work to.
- Competently fulfil site management duties as required to assist the Project Delivery Engineer and wider specific WMA Project teams on both small and large value engineering projects.
- Liaising with Finance team to assist in the preparation, management and reporting of project budgets. Being competent and working within the Boards Financial Management Regulations to administer tendering, value for money / cost benefit assessments, purchase orders, invoicing, timely reconciliation and reporting of project budgets as required.
- Responding at times of emergency, as and when necessary or required.
- Dealing with queries, undertaking routine correspondence, and liaising with the public.
- Assisting with the preparation of reports for Board meetings and representing the Boards at internal and external meetings as and when required.
- Preparing ad hoc reports, completing forms and responding to various requests for information as required.
- Adherence to all relevant health, safety and environmental standards and legal requirements as set by the Board and wider industry.
- Preparing and updating risk assessments, method statements, and safe systems of work as and when necessary. Preparing health and safety risk assessments that are site specific where the risk is not covered by a generic risk assessment or where something else is otherwise out of the ordinary. Communicating the corresponding safe systems of work to the works / health and safety supervisors, workforce / contractors and ensuring that they are fully understood.
- Ensuring that accidents are recorded properly and completely in the accident book and advising the health and safety officer of this accordingly.
- To be an advocate of high standards of health, safety and environment and impress this upon the working project teams established to achieve the maximum outcomes for people, project and the environment.

- Ensure that operatives and or contractors strictly comply with all environmental risk assessments, conservations policies and environmental standards.
- Liaising with the ICT Team to maintain the integrity of all data relating to the Boards' drainage infrastructure.
- Keeping knowledge current and up to date, by way of continuous professional development (CPD). Time and access to relevant training courses will be provided, however you will also be expected to invest a significant amount of your own time.
- Carrying out specific projects, research and any other duties that may reasonably be required by the Project Delivery Manager, Area Manager, the Chief Executive or the Board.
